held-out positions · per speaker · direction right ⇔ cos ≫ shuffled; magnitude right ⇔ gain ≈ 1 (>1 = prediction too short)
plastic · direction: cos(real − mean, pred − mean)
ceiling: vase from other vases (median 0.81)
cube+vase from singles (mean of 5) (median 0.50)
shuffled singles (median -0.03)
gastro · direction: cos(real − mean, pred − mean)
ceiling: vase from other vases (median 0.88)
cube+vase from singles (mean of 5) (median 0.68)
shuffled singles (median 0.07)
cardboard · direction: cos(real − mean, pred − mean)
ceiling: vase from other vases (median 0.73)
cube+vase from singles (mean of 5) (median 0.53)
shuffled singles (median 0.02)
plastic · magnitude: gain of real along pred (1 = right size)
ceiling: vase from other vases (median 1.06)
cube+vase from singles (mean of 5) (median 1.02)
shuffled singles (median -0.80)
gastro · magnitude: gain of real along pred (1 = right size)
ceiling: vase from other vases (median 1.03)
cube+vase from singles (mean of 5) (median 1.12)
shuffled singles (median 0.62)
cardboard · magnitude: gain of real along pred (1 = right size)
ceiling: vase from other vases (median 1.04)
cube+vase from singles (mean of 5) (median 1.03)
shuffled singles (median 0.76)
